DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Pathak et al (U.S. Patent No 4,223,394).

Figure 1 of Pathak et al disclose a read bias and amplifying system comprising a first read bias and amplifying circuit (10a), a second read bias and amplifying circuit (10b), and a differential amplifier (11) connected between the first circuit (10a) and the second circuit (10b).

Allowable Subject Matter

Claims 2-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record fail to teach or suggest a quick charging means and a feedback means in the read bias and amplifying circuit so as to prevent the potential on a bit line from exceeding a read bias potential as disclosed in claims 2-8.
